Dear Parents and Carers,

Re: Important Information Regarding Homework during the School Transition

I hope this letter finds you and your family in good health. Our school is excitedly moving into a new building, which will require some changes in the way we deliver education to our students. As the Curriculum Leader of Mathematics, I wanted to share our plan for ensuring your child's learning continues smoothly during this transition period.

To maintain continuity in your child's mathematics education, we have prepared a homework pack consisting of five to six lessons. These lessons cover a range of topics aligned with the current curriculum. The homework pack includes worksheets designed to reinforce their understanding of the concepts covered. Additionally, we have compiled online video links as supplementary resources to support their independent learning at home. In addition to the printed copy provided to your child, the pack will also be uploaded to your child's google classroom.

Your child will receive the homework pack before the transition period begins. It will outline the specific lessons they need to complete and provide clear instructions on accessing the accompanying worksheets and online video resources.

While we strongly recommend attending the live online lessons, we understand that circumstances may prevent some students from joining them. In such cases, the online video links will serve as a valuable tool, enabling your child to learn and review the lesson content independently. These videos provide additional explanations and demonstrations to support their understanding.

To ensure a well-rounded education, we encourage your child to dedicate specific time slots for completing their mathematics homework each day. This will help establish a routine and ensure steady progress through the assigned lessons. Our dedicated mathematics teaching staff will be available during regular school hours to offer support through email or google classroom/ google meet should your child require assistance or have questions.

We understand that the transition period may bring challenges. However, we are committed to your child's education and providing them with the necessary resources to excel in mathematics. By working together as a team - students, parents, and teachers - we can ensure a smooth transition and continued academic progress.
